

Why are the monopoly power companies **attacking** Dr. John Bizon?

Have you seen the phony attack ads being run against Dr. John Bizon on TV and radio? *What's really going on?*

Don't be fooled! DTE Energy is funding a so-called "citizens interest group" called the "Alliance for Michigan Power" (AMP). Consumers Energy is funding a similar group called "Citizens Energizing Michigan's Economy" (CEME). Together, these two groups are spending big money to attack Dr. John Bizon. *Why?*

Here's why: Dr. Bizon voted against a bill in 2016 that would have given DTE Energy and Consumers more monopoly power in our state. They want to force you to buy electricity only from them!

You see, Dr. Bizon favors competition in our electricity market. *More competition means more choices for you and lower rates for Michigan families and employers.* The monopoly power companies don't like that one bit!

These fake "citizen groups" called AMP and CEME (funded by DTE Energy and Consumers) have also *attacked other Republican candidates* in Michigan who voted with Dr. Bizon to give families more choices and lower rates. They are desperate to keep their monopoly control of your business. Now they are brazenly attacking Republican lawmakers like Dr. John Bizon to prevent any threat to their monopoly power. Is that fair? *Not at all!*

Here's the truth: Dr. John Bizon has worked extremely hard to grow Michigan's economy since he was first elected to office. In fact, he's endorsed by the Michigan Chamber of Commerce and supported by the Small Business Association ("A" rating) for consistently promoting new jobs and new investment in our economy. When you get the truth, you won't fall for lies from the monopoly power companies!
